There have been a number of road changes in Middleton Grange since school resumed, due to temporary road closures for road works. Expected road completion dates were unfortunately extended into the school year due to the heavy rain in January.

Liverpool Council has been working closely with the developers to ensure the safety of motorists and pedestrians around these work zones. Some of the changes are temporary, for the duration of the current road works. Other changes will be permanent. Further changes will continue to be made as the roads around the school continue to develop. See below for details.

On behalf of Council, Green Valley Police and local residents, we ask that motorists remain patient, drive lawfully and to be aware of the road changes. There has been an understandable amount of confusion and frustration from parents in the last week. However, many parents are not obeying the road rules. We ask that you follow the recommended detour route. Motorists cannot U turn over double barrier lines anywhere on Southern Cross Ave between Windsock Ave and Kingsford Smith Ave. This includes on the corner of Windsock Ave and Southern Cross Ave.

There is No Stopping on the northern side of Southern Cross Ave (the construction side) between Windsock Ave and Kingsford Smith Ave. But the No Parking restrictions have been removed on the school side. It is now unrestricted.

Children’s safety is the most important issue to consider when you are deciding where and how you drive and park around the school. It may take you longer to walk that bit further from where you have to park and longer to drive home via the detour route. But the restrictions are there for a reason. To keep you all safe.
